

Summer 2024 Project Scientist/Environmental Engineer Internships Available

Kieser & Associates, LLC, an environmental science and engineering firm based in Kalamazoo, MI has openings for Summer 2024 technical internships. The firm will consider highly motivated and detail-oriented individuals to assist with field work and technical tasks associated with water quality monitoring, limnology, biocontrols for aquatic invasive species, aquatic vegetation surveys, data compilation, statistical analyses, and research associated with watershed management, stormwater management and BMP retrofit design. Individuals with aquatic and wetland plant identification skills and/or harmful algal bloom assessment experience will receive preference for the Project Scientist internship. The Environmental Engineering internship will emphasize watershed hydrology experience. Individuals should minimally be nearing completion of a bachelor's degree in Biology, Ecology, Environmental Engineering, Water Resources or a closely related discipline. Graduate students pursuing advanced degrees will receive priority consideration. These are 3-month contract internship positions (40 hours/week). Hourly compensation will range from \$18-\$20/hour depending on experience and qualifications. Overtime will be compensated. Remote work is not an option. Opportunities for full-time positions may be extended to successful interns following completion of their degrees. Send resumes, references and signed cover letters to:

Becky Hough, Office Manager, Kieser & Associates, LLC, 536 E. Michigan Ave, Suite 300, Kalamazoo, MI 49007; or electronically to: bhough@kieser-associates.com.
